

Lytespan Track

Basic®/Advent®

Basic® One-Circuit Track

Basic® Lytespan track can be mounted in a variety of surface or stem patterns, installed vertically or horizontally on walls, and be cut in the field. Basic® track can also be used with Suspension Beam or Recessed Housings. Capacity is 20 amps at 120V per branch circuit. For straight runs, order one 2-foot, 4-foot or 8-foot Individual Track section and as many 8-foot Joiner sections as required including each straight run of track between intercepts. For added convenience and economy, Plain Track can be used in place of Individual Track in applications not requiring a Live-End, such as for patterns.

Advent® One or Two-Circuit Track

Advent® can be mounted in a variety of surface or stem patterns, installed vertically or horizontally on walls, and be cut in the field. Advent® can also be used with Suspension Beam or Recessed Housings. Total track capacity is 40 amps when supplied by a 120/240V three-wire branch circuit. A choice of power feeds is available, all of which allow a variety of configurations powered at any point. For straight runs, order one 4-foot or 8-foot Individual Track section plus as many 8-foot Joiner Track sections as required including each straight run of track between intercepts. For added convenience and economy, Plain Track can be used in place of Individual Track in applications not requiring a live end such as with patterns.

Note: Lightolier does not recommend dimming of circuits with shared neutrals.

For more detailed information see Application Guide, page 352-355.
