Product Features

Top Product Features

- Precision designed optical performance
- Offered in both standard and high efficacy versions
- High performance efficacy up to 210 lm/W
- Efficient 1-for-1 replacement of linear fluorescent & HID fixtures
- Lumen packages – 12K, 15K, 18K, 24K, 30K, 36K, 48K, 60K
- Narrow, medium, and wide distribution

Dimensional and Mounting Details

OHB-12SE, 15SE

OHB-18SE, 24SE, 30SE

OHB-36SE, 48SE, 60SE

Notes	Notes		Notes	
(4) For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack. (5) EM options available in 0°C - 45°C ambient. (6) Used to transfer fixture to secondary power during outage. Must be used in conjunction with UL 1008 device (provided by others). These options require 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. A maximum of two devices can be used on one product. (7) GRT2 option only available with 4ft fixture (36K, 48K, and 60K lumens). (8) OHB-SPM mounting not available with EL20W or ETRD options. (12) Refer to Ambient Chart for temperature ratings. (13) Ambient temperatures limited to 40C when using emergency, sensors, or SLTD in conjunction with 347V or 480V.	(14) Sensor or UNC not available in conjunction with 5LTD driver.		(2) When ordering sensor or EBP/TD option, specify as UNV (for 120V or 277V), 347V or 480V. (3) Requires use of MC or MPC cord accessories, specify voltage for plugs (MP). (9) High Ambient not available with integrated emergency.	

Accessories

Accessories (order separately)
OHB-WG112 =Wire guard for 12SE and 15SE OHB-WG162 =Wire guard for 18SE, 24SE, and 30SE OHB-WG164 =Wire guard for 36SE, 48SE, and 60SE Y-TOGGLE =Y Mounting Toggle, #2 Cable (Specify 10' or 30") FH-1 =Fixture Hook ⁽¹¹⁾ FL-1 =Fixture Loop ⁽¹¹⁾ OHB-SPM =Single Point Mounting Hub ⁽⁹⁾ MPC3 =3' Modular Power Cord & Plug (Specify Voltage) MPC6 =6' Modular Power Cord & Plug (Specify Voltage) MC3 =3' Modular Power Cord MC6 =6' Modular Power Cord SWPD3 =WaveLinX Wireless Sensor (to be installed with "ZW" sensor ready fixtures only)
Notes
(9) High Ambient not available with integrated emergency. (11) Must be used in conjunction with OHB-SPM accessory for proper installation.

Product Specifications

Construction

- Rugged and durable scalable design with rigid, steel center channel
- Mechanically attached end caps provide strength and durability
- Suspension mounting with optional wire hook and chain set or cable; Single monopoint mounting with SPM tong hanger

Electrical

- Long-Life LED system coupled with electrical driver for optimal performance
- LED's available in 3000K, 3500K, 4000K and 5000K with 70 CRI, 80 CRI and 90 CRI options
- Electronic drivers are available for 120-277V, 347V and 480V applications
- 0-10V dimming control (standard)
- Operating temperature of -40°C to 55°C (refer to chart)

Emergency Battery Pack Option

- 20-watt, 120-277V integral emergency battery pack available to meet critical life-safety lighting requirements
- 90-minute batteries provide constant power to the LED system, ensuring code-compliance
- Emergency/generator transfer options available (see ordering information for details)

Optics

- Precision designed optics deliver even illumination
- Offered in Narrow, medium and wide distributions

Shielding

- Standard lensing provides additional LED protection and optical control
- Optional wire guards available for more complex environments

Controls

- Integral occupancy sensor option provides 600 sq. ft. to up to 1250 sq. ft. of coverage in a maximum mounting height of 45' for occupancy sensing and daylight harvesting
- Integral 360° or 180° motion sensor
- LumaWatt wireless sensor system option
- Integrated Wavelinx Wireless Sensor option provides 1200 sq. ft. coverage
- WaveLinX wireless enabled (does not include sensor)

Finish

- White enamel finish preceded by a multistage cleaning cycle
- Iron phosphate coating with rust inhibitor protects against contaminants and oxidation

Compliance

- cULus listed for damp locations
- LED modules comply with IESNA LM-79 and LM-80 standards
- DesignLights Consortium® Qualified and classified for both DLC Standard and DLC Premium (refer to www.designlights.org for details)

Warranty

- Five year warranty standard.

Modular Power Supply Option

Modular Power Supply option is available for use with all F-Bay products. The modular power supply allows external fixture access for safe and easy servicing. There is no need to remove lamps or reflectors to disconnect fixture power with Modular Power Supply. Access to the individual fixture's power supply allows servicing without turning off all the fixtures, disrupting occupants. F-Bay Modular Power Supply is a time saver in installation – **simply plug & power.**

1. Modular Power Supply Receptacle supplied mounted into fixture Access Plate.
2. Modular Power Cord & Plugs in 120, 277, 347, & 480V configurations for easy plug & power into existing supply.

No internal fixture access required for installation or disconnecting power.

Lumen Maintenance

Ambient Temperature	TM-21 Lumen Maintenance (60,000 hours)	Theoretical L70 (Hours)
25°C	> 84%	> 117,000

Code Compliance

- UL/cUL Certified for Make/Break under load (UL2549)
- Meets NEC requirements for ballast disconnect (NEC 410.73G)
- Receptacle complete with insulating/dust cap

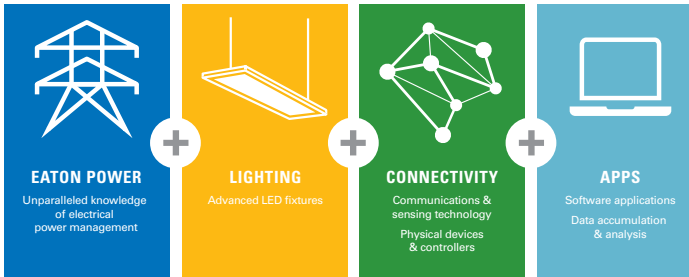

Control Systems

- WaveLinx
- DLVP
- LumaWatt Pro
- iLumin Plus
- VividTune

DESCRIPTION

MWS, Modular Wiring Systems, provides low cost installation of branch circuit wiring for lighting and power. Using modular components that plug together, MWS can be installed in a fraction of the time of hardwiring. Plus, MWS offers the advantage of relocating fixtures and outlets in future renovations.

The MWS Drop SO Cords (DS) are used to feed Industrial LED, HID and fluorescent lighting fixtures from a Circuit T (CT) that provides circuit selection.

Fixtures wired with MWS Drop SO Cords can be unplugged under load and relocated without interrupting power to fixtures downstream.

Catalog #		Type

DESIGN FEATURES

- UL Listed under Standard 183 for make or break under load.
- Meets requirements of Article 604 of the National Electrical Code.
- Galvanized steel exterior with integral keying for voltage and amperage.
- 16AWG SO cord rated at 13 amps.
- Pre-stripped leads for easy termination at fixture.
- Valox 365 constructed contact housings are approved for environmental air plenums.
- Unique double-blade contact ensures proper mating of electrical components to prevent pushback or pullout.
- Rated for single fixture feeds only.

Modular Wiring System

DIMENSIONAL DATA

MWS AUTOCAD DRAFTING

MWS offers AutoCAD drafting to layout MWS, providing the contractor with additional benefits.

MWS design layout time is reduced.

Bills of material are computer-generated guaranteeing accuracy.

MWS drawing symbols and details standardized.

Layouts are available on CD or e-mail.

To utilize this service and for additional information, contact the MWS Sales Department (888) 487-4887.

All electrical boxes, conduit, connections and switches by others.

Install dust covers on unused open ends.

Scale is exaggerated on fixtures and MWS system applications.

SYSTEM VIEW (not to scale)

Drop SO Cord (DS)

Feeds power to fixture without interrupting circuit. Provided with 16 gauge SO Cord. For use with LED, HID and industrial fluorescents.

Typical MWS Wiring System Application shown utilizing **Drop SO Cord (DS)**.

Consult MWS Installation, Application and Specification Manual for additional comprehensive system information.
